

LIFT MIC

The Ohio Department of Higher Education Ohio Means Internships and Co-ops program funds co-located and regular student internships in advanced manufacturing.

Benefits to Industries:

- Directly access talented students through 30 co-located and 50 regular internships focused on advanced and lightweight manufacturing
- Work with faculty mentors and student teams on your most pressing projects
- Access free training modules for students to quickly gain industry-specific skills
- Identify and hire highly trained interns for permanent jobs that meet your company's needs
- Collaborate with our educational institutions – from K-12 and Ohio Technical Centers to community colleges and research universities – so that they can create a curriculum that meets your future talent needs

“What really stood out to me about Adam was that we were able to give him current fixture designs, share with him a few basic ideas about what we thought we wanted, and he was able to get from there to final printed test parts on his own. . . . One of the things I admired was his eagerness to “get his hands dirty” and actually build stuff he had designed.” - Josh Dudley, Abrasive Technology, Inc.
